

Quarterly Facts – 4th Quarter 2024 (data as of 12/31/2024)

Investment Objective

The portfolio seeks capital appreciation and current income.

Investment Strategy

The portfolio seeks to achieve its objective by investing its assets in a diversified combination of underlying Transamerica Funds. Under normal market conditions, expectations are to adjust the investments in underlying funds to achieve a mix overtime of approximately 70% of assets in equities and 30% of assets in fixed income, which may include bonds, cash, cash equivalents and other money market instruments. These percentages may vary at different times. Allocation of assets among the underlying funds is based on such things as prudent diversification principles, general market outlooks (both domestic and global), historical performance, global markets' current valuations, and other global economic factors.
